

Site Development & Readiness Program

The Village of Godfrey is committed to creating opportunities for new growth and development. As another step in furthering that cause, the Village is extremely excited to announce it has added the Site Development & Readiness Program. This program assists with the removal of obsolete structures, prior building and parking lot remnants, and remediating storm water concerns. The program provides reimbursement of 50% of costs, up to \$10,000. This program was created to assist land owners and developers with making their properties “ready for development” by lowering the cost of development and making the property more attractive. It joins the Façade Improvement Program as another valuable initiative the Village of Godfrey has adopted to foster high quality growth. Business owners, property owners, bank representatives, realtors, and contractors are all encouraged to contact Village Hall for questions regarding more details, eligible locations, and the application process.

For more information, contact Village of Godfrey Economic Development at (618) 466-3324 or jmager@godfreyil.org
