

REQUEST FOR PROPOSALS

ESTATES AT EAGLE RIDGE EROSION REPAIR PROJECT

VILLAGE OF GODFREY, ILLINOIS

PROPOSALS DUE: 3:00 PM, TUESDAY, JUNE 24, 2025

The Village of Godfrey (Village) seeks proposals to repair two (2) erosion issues where stormwater pipes discharge into drainage easements within the Estates at Eagle Ridge Subdivision in the Village of Godfrey, IL.

Project Background

The project contains two (2) separate work areas, one of which is located off of Highlands Road while the other is located off of Eagle Ridge Court. Stormwater runoff from the streets discharges from pipes and into the yards between 2917 and 2911 Highlands Road as well as from a separate pipe between the yards of 4504 and 4514 Eagle Ridge Court. A considerable amount of stormwater runoff flows through the pipes, dislodging the existing riprap outlet protection, and in turn, has eroded large sections of the drainage easements and adjacent yards over the past several years as storm intensities have increased.

Project Description

The scope of work for the project will be as shown on the attached plan sheets and involves:

1. Highlands Road. The filling of the existing erosion area with asphalt millings (furnished by the Village and loaded onto contractor's trucks) or from displaced soil on site, the furnishing and installation of geotextile fabric, and the furnishing and installation of size RR4 rip rap (asphalt millings may be used as bedding) to provide for positive drainage. Restoration of the area outside of the rip rap will involve placement of a minimum of twelve inches (12") of topsoil furnished by the contractor to match the slope of the adjacent yards, followed by the installation of seed and straw.
2. Eagle Ridge Court. The realignment of a drainage swale via filling of the existing eroded area with asphalt millings (furnished by the Village and loaded onto contractor's trucks) or from displaced soil on site, the excavation and reshaping of the existing rip rap area, the furnishing and installation of geotextile fabric, and the furnishing and installation of size RR4 rip rap (asphalt millings may be used as bedding) to provide for positive drainage. Restoration of the area outside of the rip rap will involve placement of a minimum of twelve inches (12") of topsoil furnished by the contractor to match the slope of the adjacent yards, followed by the installation of seed and straw.

The work at both locations is generally located within an existing 15' wide drainage easement. Equipment and work will be confined to this easement and/or right of way and the contractor shall use

mats to access the work areas so as to protect the adjacent yards which contain irrigation systems and/or private sewage lines.

The adjacent residents have been notified of the project. Any work or access route that is proposed outside of the drainage easement shall be coordinated with the residents and will be the responsibility of the contractor.

This is a prevailing wage project. Certified payrolls will be required prior to issuance of final payment.

Project Schedule

Work for this project is expected to begin as soon as possible and is estimated to require no more than five (5) working days to complete. The contractor will be issued a notice to proceed following the submission of a Certificate of Insurance showing the Village of Godfrey as an additional insured. No utilities (other than stormwater pipes) are known to be present within the work areas, however, the contractor shall be responsible for contacting J.U.L.I.E. prior to any work. Coordination with utilities on any adjustments is considered incidental to the project and should be included in the price of the proposal.

The contractor is encouraged to perform the work when rain is not forecast for several days in order to minimize any erosion or any sedimentation. Asphalt millings will be loaded onto contractor's trucks at yard located across from 4506 North Alby Road. Contractor shall provide sufficient notice (24 hours) of when material will be required.

Submission Information

Proposals will be accepted no later than 3:00 pm on Tuesday, June 24, 2025. Proposals will not be publicly opened. A tabulation of the proposals will be issued by email as soon as possible thereafter. Proposals shall be a lump sum and shall be submitted on company letterhead. The Lump Sum Proposal shall consist of the following items but not limited to: mobilization; layout; hauling and disposal of any and all waste and excess material; excavation; hauling and installing asphalt millings; furnishing and installing topsoil; grading; seed and straw; and final cleanup. Submissions may be made by mail, hand delivery, or e-mail. E-mail submissions are preferred.

If mailing or delivering the proposals, send them to:

CONTRACTOR'S AFFIDAVIT FOR PUBLIC CONSTRUCTION PROJECTS

STATE OF ILLINOIS)
) ss
COUNTY OF MADISON)

The undersigned, being duly sworn, does state and depose as follows:

1. I am the _____ (title) of _____ (company) which is a contractor on the **Estates at Eagle Ridge Erosion Repair Project** and authorized to sign this Affidavit on the Company's behalf.

2. I have verified the information set forth in this Affidavit for the Contractor. If any subcontractors have been retained on the Project, I have also verified the information as to any subcontractor.

3. The Contractor and its subcontractors have Workers' Compensation Insurance that covers its employees working on the Project and such insurance meets or exceeds the requirements established by law. A Certificate of Insurance (COI) shall be submitted to the Village for approval prior to beginning any work.

4. The Contractor and its subcontractors have verified the U.S. citizenship or lawful status of all workers employed on the Project and do not knowingly employ any person who is an unauthorized alien in connection with the contracted services.

5. The Contractor and its subcontractors have been informed by the Village of the requirements to pay prevailing wage and will pay the prevailing wages to all workers employed on the Project as established by the applicable Annual Wage Order for Madison County, Illinois, or the federal wage order, whichever is greater. Prior to making any payments to the Contractor, the Village shall receive a Certified Payroll for the period billed by the Contractor.

6. The Contractor and its subcontractors are in compliance with federal law requiring an accredited apprenticeship program, if applicable.

7. The Contractor and its subcontractors are enrolled and participate in a federal work authorization program with respect to employees working in connection with the contracted services.

Further Affiant sayeth naught.
