ADDENDUM #1

WICK-MOR PLACE AND STOREYLAND SUBDIVISIONS DRAINAGE IMPROVEMENTS

DRAINAGE STUDY, PRELIMINARY ENGINEERING, LAND ACQUISITION, AND CONSTRUCTION ENGINEERING SERVICES

VILLAGE OF GODFREY, IL

ISSUED: NOVEMBER 20, 2026

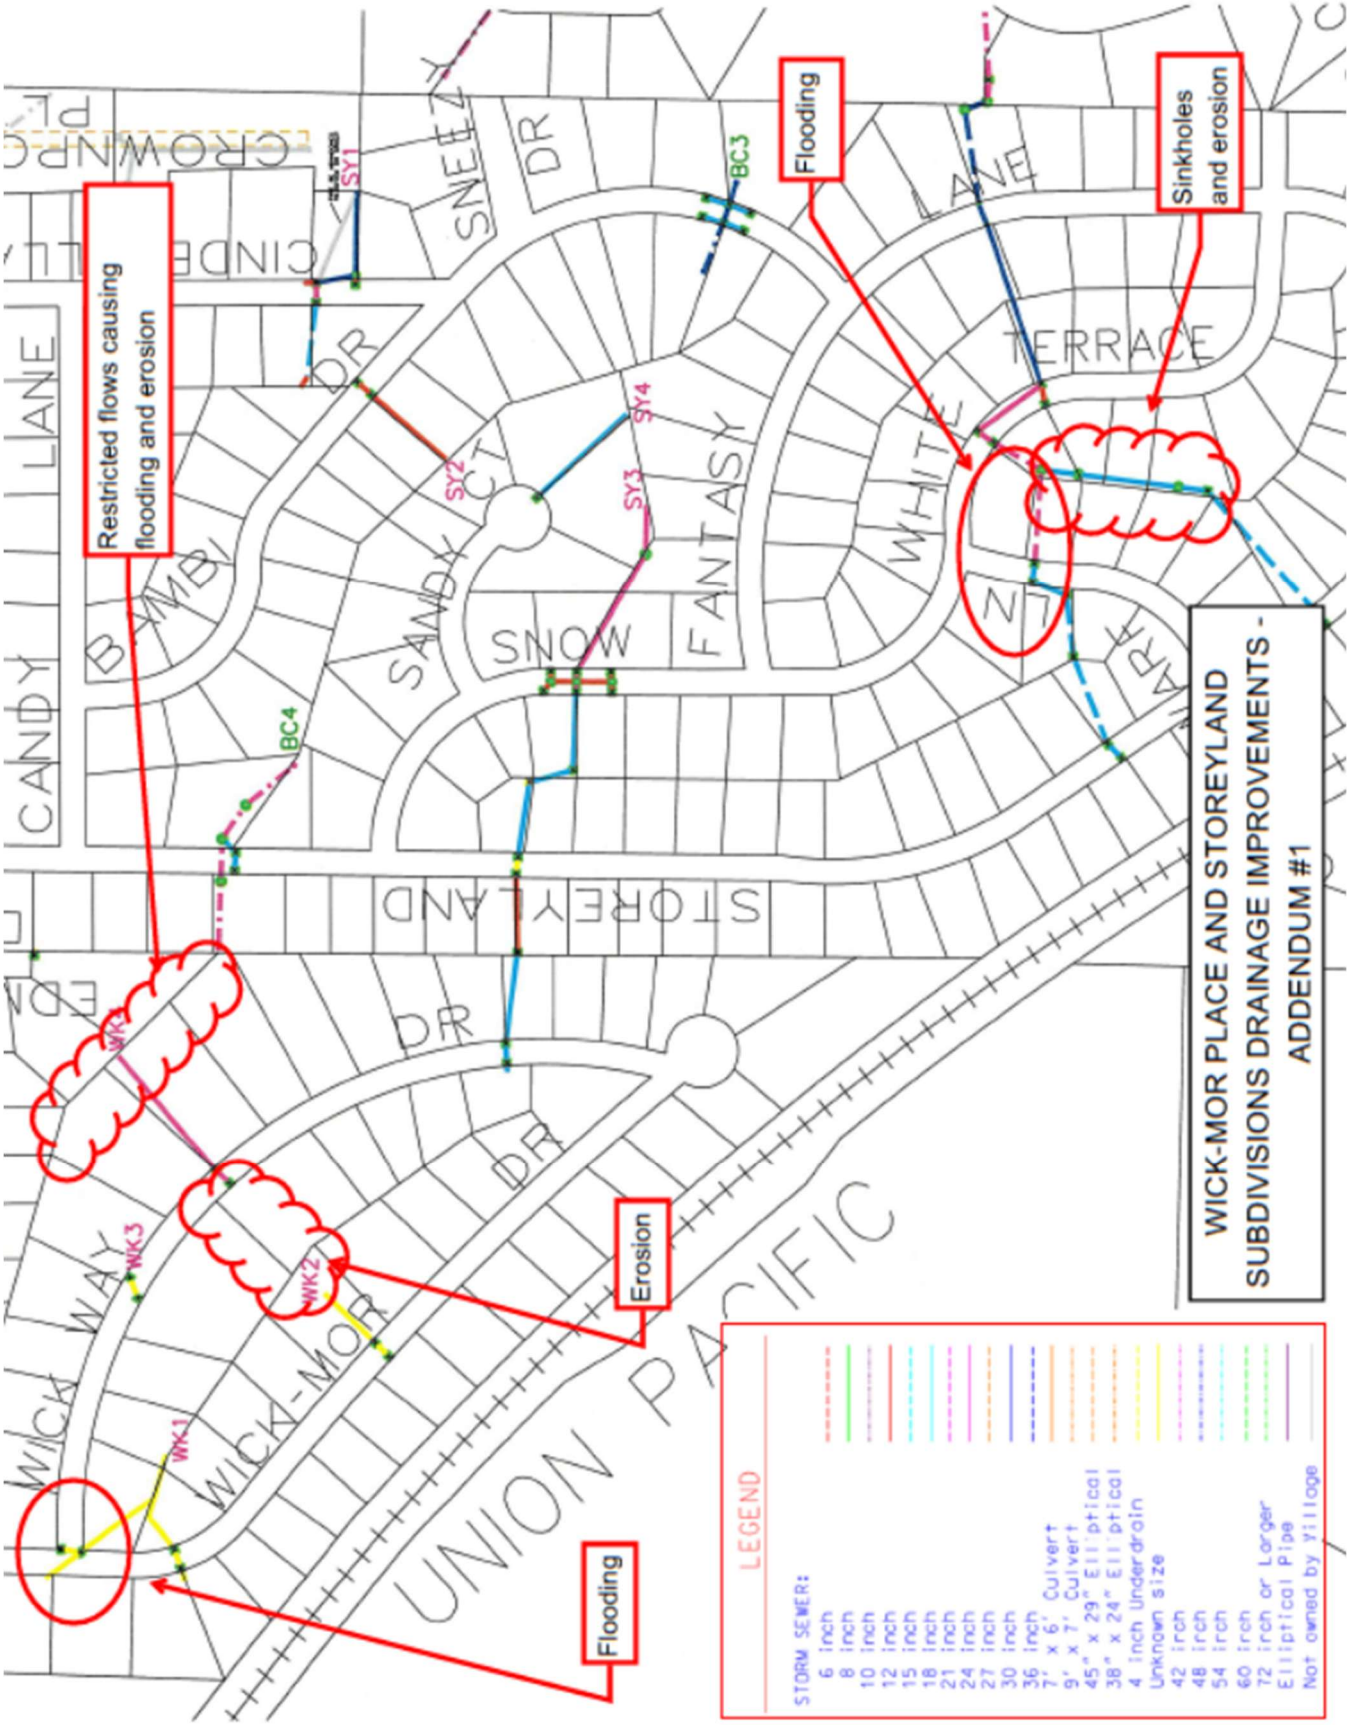

This Addendum #1 supplements the Request for Qualifications (RFQ) issued November 6, 2026, for the Wick-Mor Place and Storeyland Subdivisions Drainage Improvements project. The attached map is provided to identify certain drainage concerns presently known to the Village and to assist firms in understanding the existing storm sewer system and project conditions.

Attached Exhibit. Exhibit A - Known Drainage Issues and Storm Sewer Mapping is attached to this addendum. The exhibit depicts existing mapped storm sewer alignments, pipe-size categories, and annotations identifying reported or observed drainage concerns in the two subdivisions.

Use of Map Information. The map is provided for informational purposes only. The illustrated features and problem areas are not intended to represent a complete inventory of drainage facilities, deficiencies, or necessary improvements. The Village does not warrant that the depicted pipe sizes, locations, connections, elevations, or ownership are complete or accurate. The selected consultant will be responsible for field verification and any additional investigation required to complete the scope of services.

Scope of Services. This addendum does not limit the study to the areas marked on the exhibit or establish predetermined solutions. The scope remains as described in the RFQ, including evaluation of known and unknown drainage issues throughout both subdivisions and relevant upstream and downstream drainage areas, public outreach, hydrologic and hydraulic evaluation, alternatives analysis, and assessment of potential off-site impacts.

RFQ Requirements and Schedule. All other terms, conditions, submittal requirements, evaluation criteria, and deadlines remain unchanged. Requests for clarification remain due by 12:00 PM on November 25, 2026, and Statements of Qualifications remain due by 10:00 AM on December 4, 2026.
